PROJECT

Online Course Purchase System

- Developed reusable UI components in React.js with functional hooks and state management.
- Optimized API calls using Axios for efficient RESTful API client-server communication and minimal load time.
- Implemented JWT-based token authentication for session management, storing tokens securely and managing route-level access control, for registration and login workflows.

Shopping Cart

- Structured the app using a layered architecture (Component, Service, Data layers) to ensure modularity and maintainability.
- Developed the UI using React.js, with form handling via Formik and routing using React Router DOM.
- Applied HTML/CSS for responsive design and layout.
- Utilized Redux Toolkit for global state management.
- Integrated RTK Query for efficient API data fetching, caching, and auto re-fetching.
